Words from Vice Chairman

Assist the activities that match the characteristics of each Hair Salon.

I think the job of Hair-Dresser is turning client's request into reality with their technique and knowledge. It is easy to say, but it is very difficult in reality. Therefore, Hair-Dressers are learning and training day after day. Gamo think supporting the ambition of Hair-Dressers will bring prosperity to their salons, and we focus on human resource development through education activities. I think we are focusing on mainly three activities. I-Provide environment(studio)where Hair-Dressers learn. 2-Provide more than 1000 seminars, lectures, hair shows, etc yearly, which improve technics and raising humanity as professional Hair Dressers. 3-Assist activities of each Hair Salons through providing relevant information of new products and service. As our business stage spreads throughout Japan, we are striving to enrich branch offices, branches and studio networks from Hokkaido in the north to Kyushu in the south and provide the same service all over the country. We will celebrate 100th year in 2027. It is said that the world is now at the entrance of the Fourth Industrial Revolution and AI • IoT • Big data usage will change business and methodology greatly, but I think the essence of "Dealer Business" will not change. Our activity of delivering customized service which suits each Hair Salons characteristics is inherited from Mr. Gamo, chairman. Our philosophy is "Whatever (hard / soft), Whenever and As Much As Needed", and we would like to challenge by looking at the future, so we can develop together with every Hair Salons.
